14) Review of the performance of the Company and its principal subsidiaries

For the second quarter under review, the Group recorded a pre-tax profit of RM2.033 million which was lower than pre-tax profit of RM2.758 million in the corresponding quarter of previous year. Cumulatively, for first half year, the Group recorded a pre-tax profit of RM3.973 million with turnover of RM246.928 million. The profit was lower compared to corresponding first half of last year mainly due to lower sales volumes and margins.

The markets remained difficult due to slow recovery in domestic demand in the construction sector and intense competition. The financial position of many units in the wire and cable industry continues to be weak affecting timely collections.

Subject to above, in the opinion of the Directors, the results of the operations for the Group have not been substantially affected by any item, transaction or event of a material and unusual nature as at the date of this report.

15) Material Changes in Quarterly Results

Pre-tax profit for the quarter of RM2.033 million was marginally higher compared to that of the preceding quarter's pre-tax profit of RM1.940 million mainly due to higher sales volumes.

16) Current year Prospects

Business conditions are continuing to deteriorate while raw material costs are increasing. Selling prices remain under pressure due to over capacity in the region.

The poor health of the cable industry, which is the principal user of the company's products, has increased the credit risks. Collections are being monitored closely and continuously.

The Group is focusing its efforts on improving the overall margin in an uncertain economic environment.

The Company is continuing to seek new opportunities for growth in the region in this difficult market environment. As stated earlier in Note 11, a subsidiary in Thailand has been incorporated to manufacture copper products.

Barring any unforeseen events, the Board expects the performance of the Group for the financial year 2003 to be satisfactory in the context of a difficult and oversupplied market as explained above.

There was no profit forecast or profit guarantee issued during the financial period to-date.
